# **Summary**

#1 Issue: Insulate attic to r-50 and seal foundation rim joists.

#### Attic:

- Remove all contents.
- Install vent chutes between each truss.
- Add 10 inches cellulose to r-35.
- Redo attic access hole cover. Install 2' x 2' cover, seal airtight and insulate.
- Remove drop down ladder system.

#### Foundation:

- Caulk exterior foundation where block meets plywood. Seal top edge of cement block wall.
- Stuff block covers with fiberglass.
- Attach and glue 1 inch of Styrofoam to top of block wall.

#2 Issue: Insulate the shops electric hot water heater.

#3 Issue: Turn off expensive electric heaters.

#4 Issue: Install high efficiency induction fan motors in shop, home, and wood burner.

### Miscellaneous:

Discuss installing dual fuel plenum heater in furnace unit above a/c coil. The same could be done with the propane heater in the shop. Discuss switches, manual or automatic. Note \$.05 dual fuel electricity per KWH = propane at 120 gallon high efficiency furnace.

## **Miscellaneous Costs:**

Shop Electric heater - \$95

Blower Fan motor - 5 amps - 1 for furnace and 1 for wood burner - \$44

Water heater - \$30 per month for 3 people

2 Freezers - \$15

1 Electric Dryer - \$16

Well Pump - \$24

Old Refrigerator - \$15 per month - \$23

Continuous duct fan - \$2

Space heater 1100 watts = \$45
